

Gabriel Shores

Bloomington, IN | gshores@iu.edu | gabeshores.com | linkedin.com/in/gabrielshores | github.com/Msde-7

EDUCATION

Indiana University

Accelerated M.S. in Computer Science — GPA: 4.00/4.00

Bloomington, IN

Expected May 2027

Indiana University

B.S. in Computer Science, B.S. in Mathematics — GPA: 3.93/4.00

Bloomington, IN

May 2026

- Hutton Honors College; Dean's List (5x); Cox, Luddy, Founder's & Provost Scholar; VP of Hiking Club

EXPERIENCE

Software Engineering Intern

May 2026 – Aug. 2026

Uber

Sunnyvale, CA

- Owned a system end-to-end tracking 160+ reliability metrics, improving observability and catching regressions
- Built Claude AI agent tools and integrations that streamlined developer workflows, cutting flagged issues 90%
- Developed backend services on Fares (Java, Python, Go), a Tier-0 system serving millions of riders and drivers

Software Engineering Intern

May 2025 – Aug. 2025

Allied Solutions

Carmel, IN

- Engineered a serverless AWS document pipeline (Lambda, DynamoDB, API Gateway), saving \$64k+ annually
- Modernized legacy C# .NET and SQL Server code, improving performance for a database serving 1,000+ banks

Software Engineer, Co-Founder

Nov. 2024 – Present

Lawgic Prep — Gamified LSAT Practice, Official LSAC Licensee

Bloomington, IN

- Built an EdTech platform (React, Python, Google Cloud, Stripe) with an AI essay grader and 900K+ applications
- Secured a rare official LSAC license (<100 globally) and negotiated pre-law sponsorships for early adoption

Peer Academic Coach, Data Analyst

Aug. 2023 – Present

Indiana University Advising and Major Exploration Services

Bloomington, IN

- Raised advising service usage 40%+ using Tableau, Excel, and Python analysis; presented at campus symposium

PROJECTS

Distributed Crypto Limit Order Book Pipeline | *Kafka, Spark, Docker, Python*

- Engineered a distributed Kafka-to-Spark pipeline (Dockerized) processing 50k+ events/sec; best of ~30 in class
- Built concurrent Python ingestion normalizing Binance, Coinbase, and Kraken APIs for real-time order books

Graph Anomaly Detector | *Python, scikit-learn, NetworkX, PyVis*

- Built an ML pipeline flagging suspicious accounts via IsolationForest over PageRank and Louvain features
- Ingested live Reddit and X graphs; scored precision/recall/F1 and visualized them in an interactive PyVis app

RESEARCH

Undergraduate Researcher

Aug. 2024 – Dec. 2025

Math Cancer Research Lab — PhysiCell Project

Bloomington, IN

- Profiled and optimized multi-threaded C++ on Linux, cutting simulation runtime 3x via cache-aware tuning
- Implemented numerical PDE solvers and statistical algorithms in C++ and Python for large-scale models

LEADERSHIP

Director of Technology; Faculty Council Technology Policy Member

May 2025 – Present

Indiana University Student Government

Bloomington, IN

- Built and maintain accessible web systems and internal tools serving 35,000+ students university-wide
- Direct a technology committee and an intern, and shape campus-wide tech policy as a Faculty Council member

Director of Technology

Aug. 2024 – Present

Fintech at Indiana University

Bloomington, IN

- Built a JavaScript/SQLite Discord bot with real-time APIs for the club fund, logging 400+ interactions
- Teach computer science and quantitative finance to 265+ members from diverse academic backgrounds

TECHNICAL SKILLS

Languages: Java, Python, Go, C++, C, JavaScript/Node.js, SQL

AI/ML: PyTorch, scikit-learn, NumPy, Pandas, Claude agent skills, ML pipelines, feature engineering

Infrastructure: distributed systems, GCP, AWS, Docker, Kafka, Spark, CI/CD, Linux, multi-threading

Coursework: Advanced Algorithms, Data Structures, Machine Learning, Operating Systems, Discrete Math
